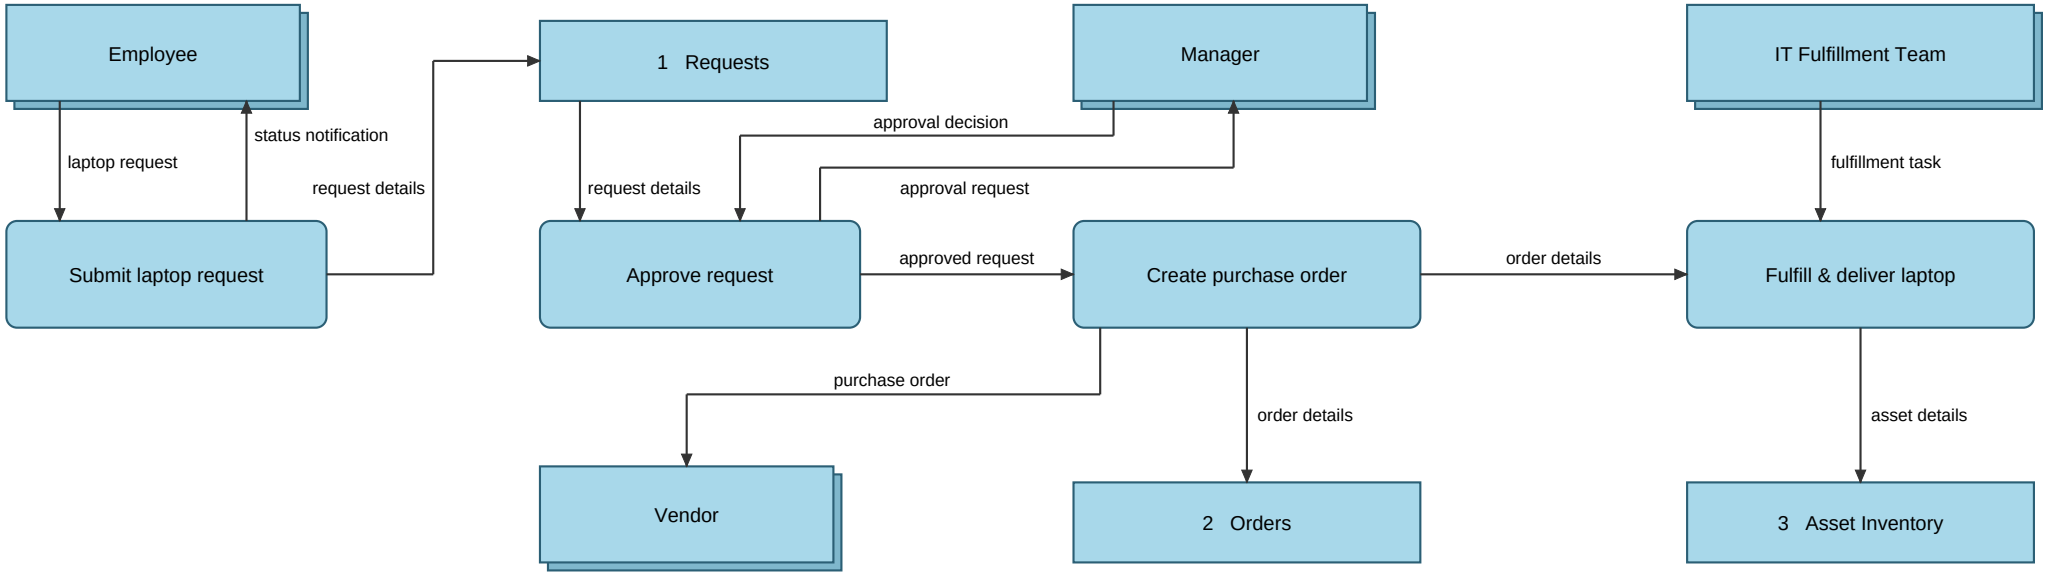
Project Design Phase-II
Data Flow Diagram & User Stories

Date	29 September 2026
Team ID	SWTID-2026-5078
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Example: DFD Level 0 - Automating Standard Laptop Orders with Flow Designer



1. Employee selects the Standard Laptop item in the service catalog and submits a laptop request.
2. Flow Designer stores the request and sends an approval request to the employee's manager.
3. Manager approves or rejects the request; the decision is recorded and the employee is notified.
4. On approval, Flow Designer creates a purchase order and sends it to the vendor.
5. IT Fulfillment receives the task, delivers the laptop, and updates the asset inventory.

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Employee (Requester)	Request Submission	USN-1	As an employee, I can log in to the service portal and open the Standard Laptop catalog item.	I can access the laptop request form	High	Sprint-1
		USN-2	As an employee, I can select a laptop model from the approved standard list and submit my request with a business justification and needed-by date.	I can submit the request and a request number is generated	High	Sprint-1
		USN-3	As an employee, I will receive a confirmation email once I have submitted my laptop request.	I can receive the confirmation email with my request number	High	Sprint-1
	Request Tracking	USN-4	As an employee, I can track the status of my laptop request (Submitted, Approved, Ordered, Delivered).	I can view the current status on my dashboard	Medium	Sprint-2
Manager (Approver)	Approval	USN-5	As a manager, I will receive an approval request when a team member orders a laptop.	I can receive a notification with the request details	High	Sprint-2
		USN-6	As a manager, I can approve or reject a laptop request.	My decision is recorded and the employee is notified	High	Sprint-2
IT Fulfillment Agent	Procurement & Fulfillment	USN-7	As an IT agent, I want a purchase order to be created automatically once a request is approved.	A purchase order is generated without manual entry	High	Sprint-2
		USN-8	As an IT agent, I can receive the fulfillment task and mark the laptop as delivered.	The task is closed and the employee is notified of delivery	Medium	Sprint-3
		USN-9	As an IT agent, I can update the asset inventory when a laptop is delivered.	An asset record is created and assigned to the employee	Medium	Sprint-3
Administrator	Workflow Management	USN-10	As an administrator, I can configure the Flow Designer workflow, catalog item and approval rules.	I can save and activate workflow changes	High	Sprint-3
		USN-11	As an administrator, I can view reports on laptop orders and their fulfillment time.	I can view a report of orders by status	Low	Sprint-4
