Project Design Phase
Problem – Solution Fit Template

Date	29 September 2026
Team ID	SWTID-2026-5078
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

Purpose:

- ❑ Solve complex problems in a way that fits the state of your customers.
- ❑ Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- ❑ Sharpen your communication and marketing strategy with the right triggers and messaging.
- ❑ Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- ❑ **Understand the existing situation in order to improve it for your target group.**

Template:

Define CS, fit into CC

1. CUSTOMER SEGMENT(S) — CS

- Employees (new joiners and existing staff) who need a standard laptop for their work
- IT procurement and service desk team who process laptop orders
- Department managers who approve laptop requests
- Procurement / purchase officers who place orders with vendors

6. CUSTOMER CONSTRAINTS — CC

- Multi-level approvals cause waiting time
- Limited IT staff time and procurement budget
- Orders must follow company laptop standards and policy
- Vendor catalog, pricing and stock availability limits
- Request form, approval and vendor order are not connected
- Audit and compliance records must be maintained

5. AVAILABLE SOLUTIONS — AS

- Requests by email, phone or shared spreadsheets
- Manual ticket handling and manual approvals by IT staff
- Pros: simple, familiar, no setup needed
- Cons: slow, error-prone, no real-time tracking, inconsistent process

Explore AS, differentiate

Focus on J&P, tap into BE, understand RC

2. JOBS-TO-BE-DONE / PROBLEMS — J&P

- Employees need to get a standard laptop quickly without chasing IT
- IT team needs to cut repetitive manual work on standard orders
- Managers need a simple way to review and approve requests
- Procurement needs accurate, complete orders with fewer corrections

9. PROBLEM ROOT CAUSE — RC

- Standard laptop orders are still processed manually every time
- Request, approval and purchase order steps are handled separately
- There is no automated workflow to validate, route and track the order
- Employees and IT have to depend on emails and follow-ups, so delays and errors occur

7. BEHAVIOUR — BE

- Employees raise laptop requests through email, phone or the service desk
- They repeatedly follow up to know the order status
- IT staff copy request details into approval and vendor forms manually
- Managers approve through email or verbal confirmation

Focus on J&P, tap into BE, understand RC

Identify strong TR & EM

3. TRIGGERS — TR

- A new employee is joining and needs a laptop
- Existing laptop is old, damaged or due for refresh
- Seeing colleagues wait a long time for their laptop

4. EMOTIONS: BEFORE / AFTER — EM

- **Before:** frustrated, uncertain, waiting, unproductive
- **After:** confident, in control, informed, productive

10. YOUR SOLUTION — SL

- Automate standard laptop orders using Flow Designer
- Employee submits a standard laptop request from the service catalog
- Flow automatically checks the request against the standard laptop configuration
- Approval is routed automatically to the right manager with reminders
- After approval, the flow creates the procurement task / purchase order without manual data entry
- Requester and IT get automatic notifications and can track the status until delivery
- Result: faster delivery, fewer errors, less manual work and a clear audit trail

8. CHANNELS of BEHAVIOUR — CH

8.1 ONLINE

- Service catalog / self-service portal requests
- Email or chat to the service desk
- Status checks and approval notifications online

8.2 OFFLINE

- Verbal request or phone call to the IT desk
- Walk-in visits to the IT help desk
- In-person laptop collection and handover
- Approval discussions with managers

Extract online & offline CH of BE
