Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	29 September 2026
Team ID	SWTID-2026-5078
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through Form Registration through Gmail Registration through LinkedIN
FR-2	User Confirmation	Confirmation via Email Confirmation via OTP
FR-3	Laptop Order Request	Select standard laptop model from catalog item Submit request through service catalog form Capture requester details and business justification
FR-4	Automated Approval Workflow	Flow Designer triggers approval to manager on submission Auto-approve standard laptop orders within policy Notify requester of approval or rejection
FR-5	Procurement & Fulfilment Automation	Auto-create procurement task / purchase request Assign task to IT fulfilment team Update inventory on delivery
FR-6	Tracking & Notifications	Real-time order status tracking Email notifications at each stage Order history and reports

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	**Usability**	Simple, intuitive catalog form so employees can order a standard laptop in a few clicks without IT assistance.
NFR-2	**Security**	Role-based access control, secured authentication and encrypted data; approvals restricted to authorised users with an audit trail.
NFR-3	**Reliability**	Flows execute consistently with error handling and retries so no order is lost or duplicated.
NFR-4	**Performance**	Order submission and approval routing complete within a few seconds; flow execution does not delay users.
NFR-5	**Availability**	Service available 24x7 with minimal downtime, in line with the platform uptime commitment.
NFR-6	**Scalability**	Handles growing numbers of concurrent laptop requests and can extend to other standard hardware orders.
